

## CATALOG OF U.S. GOVERNMENT PUBLICATIONS

### Planned Enhancements for the Catalog of U.S. Government Publications

This is a list of enhancements that are planned or are currently being worked on or investigated. The ILS Project staff will update this list periodically to reflect items that have been completed.

#### Enhancements we hope to have completed in 90 days after go-live

- Consistency issues (Minor wording/look and feel, spacing, search string retention)
- Resolution of incorrect Search results on *Previous Searches* page
- E-mail of records function, change date to continental not European format
- Expanded Help Page (More content, example Screen Shots)
- Expand New Titles page to retrieve new cataloging records by date range such as Week or Month
- Streamline Holdings/Items record display page (Remove unnecessary content and information, spacing)
- Customization of error/information messages
- Refine searches that contain parenthetical elements
- Performance issues. We will be gathering performance statistics to be used to fine tune and enhance system performance

#### Future Enhancements (Long range; 6 months to year +)

- Ongoing data clean up and de-duplication of records
- Cross references for Subject/Authority searching
- Possibly expand Advanced Search Limits options
- Possibly offer Search Limits such as year, language, etc. on our *Catalogs to Search* pages
  - Z39.50 gateway /Record Distribution
  - Meta searching (MetaLib)
  - FDLP logins
  - Specialized features for FDLP
- SDI
- Consider availability of AUT file to libraries
- Specialized expanded searching options
- Specialized look and feel options
  - Possibility of ability to save records to local PC \*

- Content sensitive linking (SFX)
- Spanish Language Interface

\*Indicates that research will be done, but there may be Aleph version/system limitations that prohibit this functionality
